Portfolio

Della Apriliani - S-1 Math Student

About Me

Hello! I am Della, an active student in the international class of the Mathematics Study Program with a big interest in data analysis. I have a strong foundation in statistics and Python programming, and I am accustomed to thinking analytically and systematically. I am enthusiastic about developing my analytical abilities and communication skills through an internship as a Data Analyst and contributing to a professional work environment.

Education

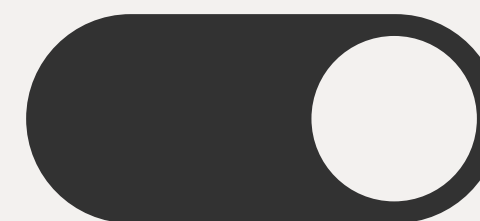

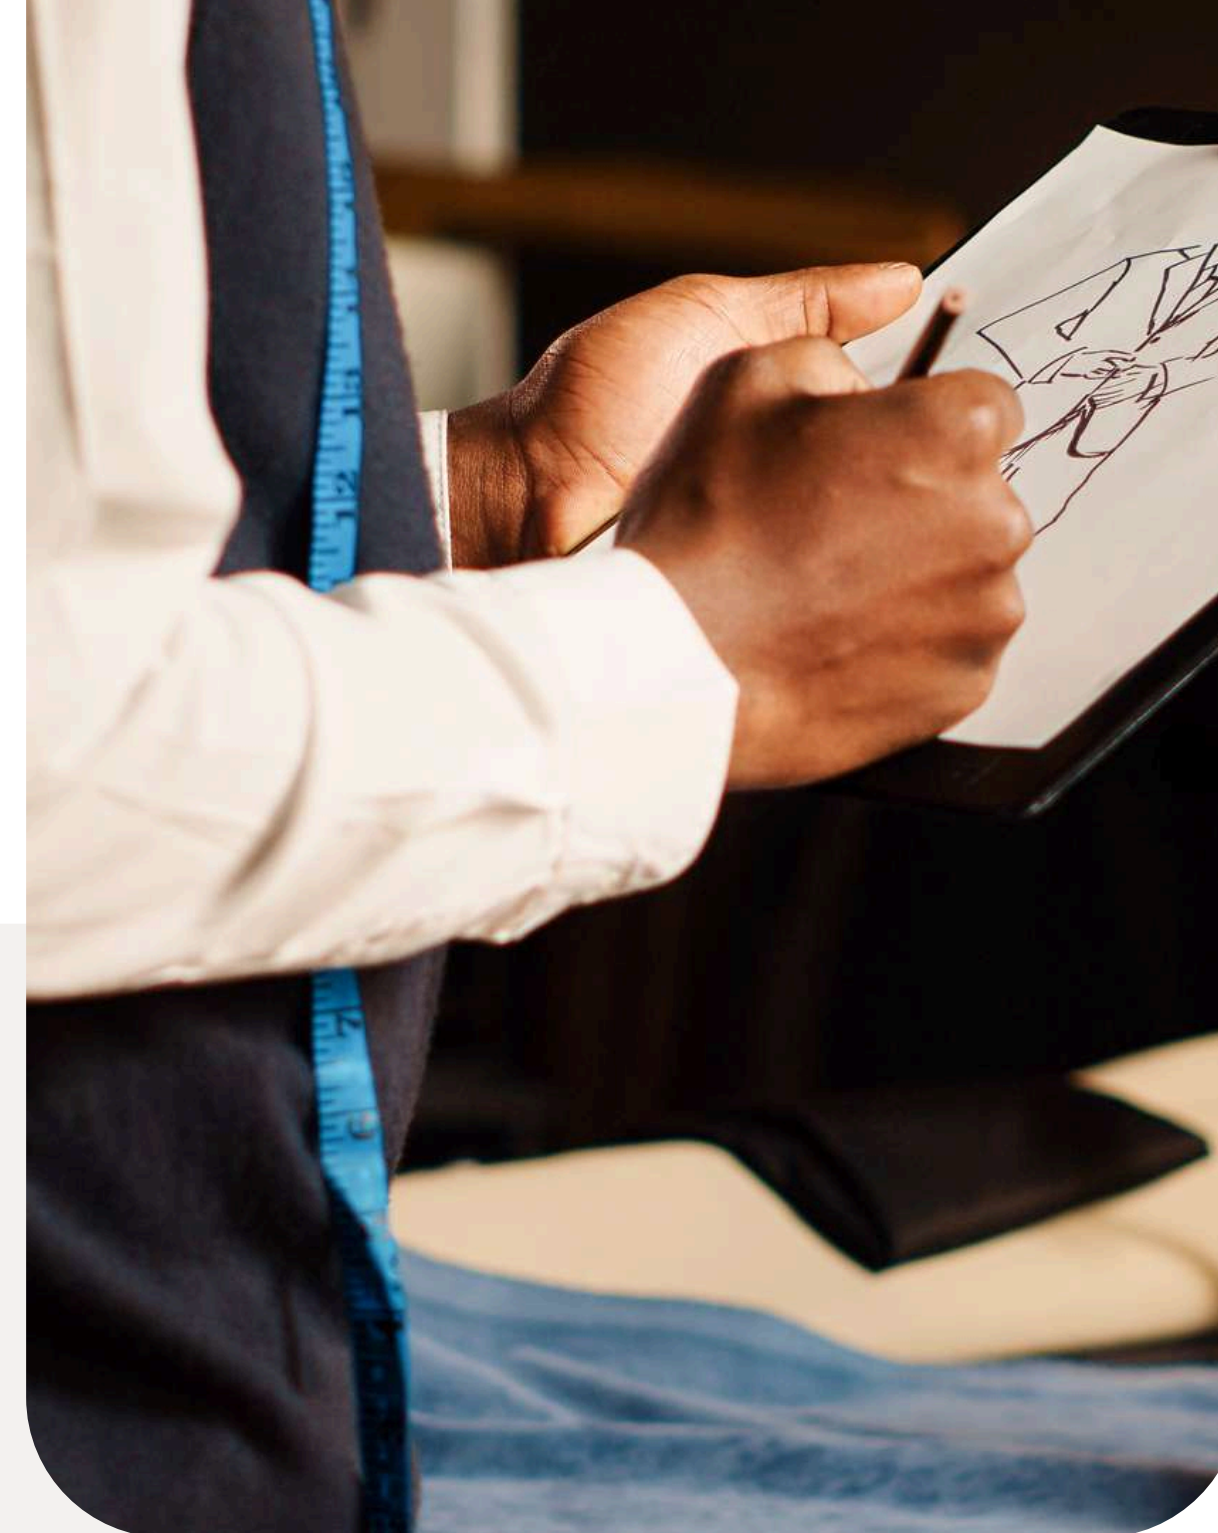

State SHS 96 Jakarta (2020 - 2023)

Science

Surabaya State University (2023 - Now)

S-1 Mathematics

GPA: 3.55 / 4.0

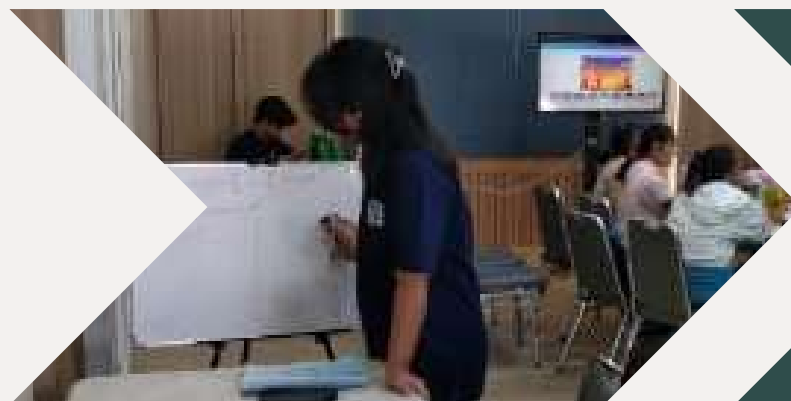

Organizational Experience

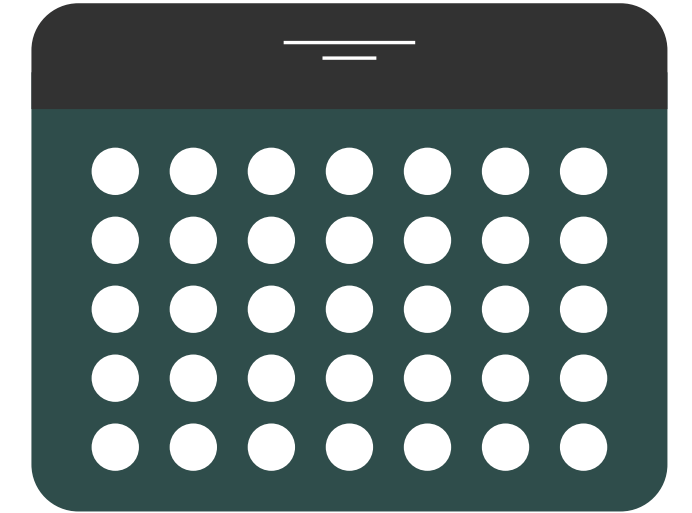

Rumah Belajar

Elementary School Mathematics Teacher (2024 - Now)

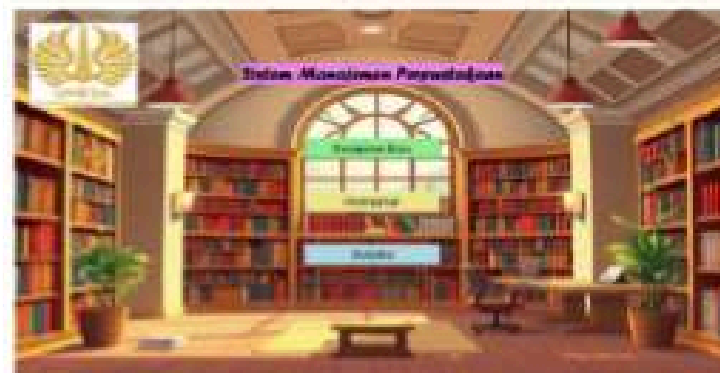

05

Projects

Projects

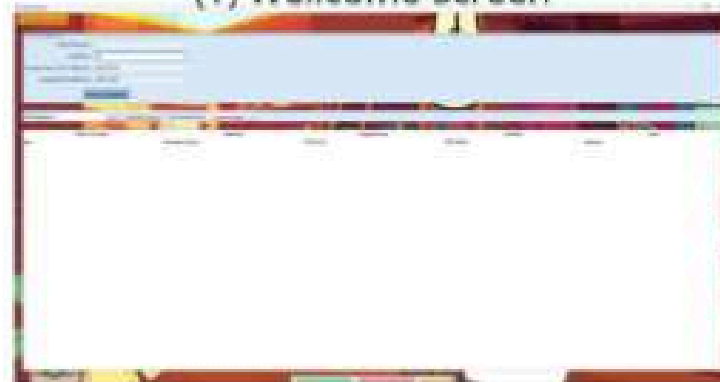

SCREENSHOTS OF RUNNING PROGRAMS

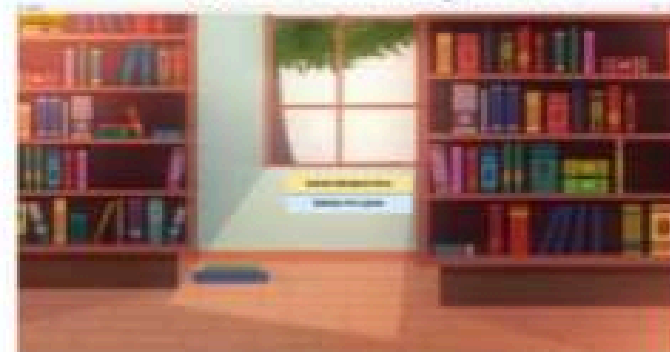

(1) Wellcome Screen

(2) Book Management

(3) Book Lending

(4) Statistic

Basic Algorithm Visualization

Creating a GUI application with Python that implements searching and sorting algorithms for library administrators. This project increased my understanding of algorithms and application design.

Application of 3D Geometry

Creating a 3D map of Probolinggo

I contributed to the visual design of the map and gathered information on tourist attractions to be featured. This project developed my research, design, and mathematical application skills in visualization.
